Request for Confidentiality

Date: <u>2012-11-12</u>		
Subject: Confiden	tiality Request for: FCC ID:X0	CO-AERA and IC: 7756A-AERA
	7 CRF 0.457(d) and 0.459 and IC RS ation be held confidential.	SP-100, Section 10, the applicant requests that a part of the
Short To	erm erm Permanent* Permanent erm Permanent erm Permanent erm Permanent erm Permanent erm Permanent erm	Exhibit Block Diagrams External Photos Internal Photos Operation Description/Theory of Operation Parts List & Placement/BOM Tune-Up Procedure Schematics Test Setup Photos User's Manual
of the first of its ki	nd in industry. Having the subject in e achieved by developing this produ	pent substantial effort in developing this product and it is one formation easily available to "competition" would negate the ect. Not protecting the details of the design will result in
		nanently confidential be permanently withheld from public roprietary information not customarily released to the public.
period of <u>(spec</u>) Authorization and por release of the print print of the print of	ests the exhibits selected above as shify number of days not to exceed 180 prior to marketing. This is to avoid poduct to the public. Applicant is also	nort term confidential be withheld from public view for a $(2)^2$ days from the date of the Grant of Equipment premature release of sensitive information prior to marketing a aware that they are responsible to notify ACB in the event de available to the public. ACB will then release the o FCC Public Notice DA 04-1705.
The applicant unde		distinguishes between Short Term and Permanent Il simply be marked Confidential when submitted to IC.
Sincerely,		
Ву: _=	(Signature/Title ³)	Wyn B.Wang(Print name)

² - Please refer to http://acbcert.com/documents/misc-docs/Memo-Short-Term-Vs-Standard-Confidentiality.pdf for complete details.

¹ - The asterisked items (*) require further justification before permanent confidentiality will be allowed. These also currently require review by the FCC under their Permit-But-Ask policy before the grant is issued and can delay completion of an application. Further justification should be added to the note above. One such example for a potted device would be: "The EUT is FULLY potted using a non-removable epoxy based material. Removal of potting material causes irreparable damage to internal circuitry. See photographs exhibits that outline the device before and after potting."
